Hapla-gel the softer way to protect feet

**Cuxson
Gerrard**

Hapla-gel is an advanced polymer gel system of dressing and appliances for the relief of pressure and friction.

Hapla-gel is made from pure medical grade ingredients. It is non toxic and hypoallergenic, the mineral oil in Hapla-gel slowly permeates the skin during wear to soften and lubricate and keep it supple. Hapla-gel products can be carefully hand washed to extend their life allowing repeated use after many applications.

Hapla-gel protects and cushions, pressure is absorbed and redistributed by Hapla-gel's soft elastic structure which helps to remove the effect of friction on the skin.

Epitactium 26®

Epitact Epitactium 26® has been designed to replicate the natural shock absorbing adipocytes found in the pads of the sole which can degenerate irreversibly due to inflammatory reactions or simply with age. Due to the minimal thickness of Epitactium 26®, there are no adverse effects on pronation / supination or the coefficient that governs shock transmission.
