Bentlon Amsterdam Patient Chair

BENTLON

The multi-functional patient chair, fitted with three separate electric motors to adjust height, tilt and back rest –all controls by foot switch.

The Amsterdam has self-levelling arms and if required can easily be placed in the Trendelenberg position.

The seat of the chair swivels 180° and the split leg rests can be moved to the side.

It is recommended that this chair is bolted to a suitable floor due to its maximum height, if this is not possible feet wideners should be used.

- Weight capacity 160kg
- Chair weight 65kg
- Height adjustment 55 to 100 cm
- Chair weight 65kg
- Dimensions 180L X 72 W cm
- Seat width 61cm
- Available in 12 colours, please specify when ordering

Doherty Kendal Bins

Doherty Kendal premium range of high specification bins. The four bins in the range have been designed specifically to suit the requirements of the modern surgery, residential, nursery care home or hospital

- Pull out handle for easy movement
- The bins are designed so that it is difficult to open them by hand, forcing the user to use the foot-operated pedal; **thus minimising the risk of cross contamination**
- Silent and slow closing which minimises the aerosol effect that can cause the spread of harmful bacteria when a traditional lid closes
- The large wide pedal design allows the sack holder to be approached from both the front and sides

- All bins come with a choice of lid colours white for domestic waste and yellow for clinical waste
- Rounded corners, no sharp edges
- Rubber feet, to stop the bin marking the floor
- Air gap, allows the free movement of air beneath the bins stopping the build up of stagnant air that could encourage the growth of bacteria
- Comes with a comprehensive two-year warranty
- All the bins are fully fire retardant to HTM83
- Both the 50 and 70 litre models are fitted with anti-static wheels as standard

1 Kendal 20 Litre Small. Smallest bin in the range with a solid body
Dimensions: 57.5H x 22W x 35D cm
